

Main Street Renewal

Construction Newsletter No. 20

April 29, 2016

On-Going

Here's a block-by-block breakdown of the work currently underway:

- **Hawthorne Avenue and Main Street Intersection:** Watermain testing and chlorination and electrical work;
- **Hawthorne Avenue to Lees Avenue:** Relocation of telecommunication cables;
- **Lees Avenue to Clegg Street:** Silva Cells installation, removal of temporary sidewalk, grading of granular base for cycle track, relocation of telecommunication cables, installation of new traffic signal poles and removal of old Hydro poles; and,
- **Clegg Street to the Rideau River:** Removal of asphalt and concrete road base, sanitary sewer installation and watermain replacement.

Upcoming

Here are key new upcoming construction activities planned for the next two weeks:

- **Harvey Street to Lees Avenue:** Road box excavation, concrete curb and removal of temporary sidewalk;
- **Lees Avenue to Clegg Street:** Concrete sidewalk at intersections, paving of cycle track and installation of brick pavers for sidewalk;
- **Brantwood Place Gates:** Removal of stone facing;
- **Clegg Street to the Rideau River Drive:** Watermain installation, and;
- **Rideau River Drive:** Replacement of lateral connections.

Silva Cells installation in front of the pharmacy.

Sunday Bikedays will take place every Sunday from May 15th to September 4th (except on May 29th). For these events, **Colonel By Drive will be closed to traffic from Hog's Back Road to the Laurier Bridge from 9 a.m. to 1 p.m.**

Main Street Renewal

Did you know?

Temporary water services are provided to all buildings while the watermain is shut down for its replacement. This is done using above ground hoses that are connected on side streets on the live watermain side of the “cut and cap”. These above ground hoses are placed along the road and front yards and are buried at driveways and intersections. Smaller hoses are used to connect each building at their outside water tap. The hoses are chlorinated and tested prior to being connected to the buildings. The water quality in the temporary system is closely monitored by the City to ensure it meets current Drinking Water Standards.
